

Member ID: _____

We recommend you this litter acceptance by your vet for your protection for the later sale of your young animals. You should take the kittens to the vet about 8 weeks after birth and in the 12th week when the animals are vaccinated to have this litter acceptance completed. Then send a copy of it to the stud book office. You and we have proof, based on these litter acceptances, for the buyer of the animal that your animals were healthy in the 8th and 12th week.

To be filled out by the breeder!

In the Cattery: _____
The litter of the cat: _____
Birth date: _____
Number of kitten in the litter: _____

To be completed by the veterinarian only!

Young animals and mother animal are apparently healthy at the time of the inspection?
(e.g. conjunctivitis, sneezing, coughing, matting of the fur, etc.)

No: () Yes:() in fact:

At the time of the inspection, the young animals are:
(e.g.: kinked tail, stiffening of the tail, heart murmurs, deformations, etc.)

Without finding: ()

The young animal(s) shows the following findings:
